

# Printing that is out of this world

Sauven 6000

The NEW technology in the Sauven 6000 on-line ink jet printer gives unbelievable quality of print for both small and large characters, graphics and bar codes!

*Seeing is believing!*

Smart thinking: *Smart printing*

## Sauven 6000

The *Sauven 6000* uses *High Speed Piezo Jet Technology* to create any characters, barcodes or graphics in an *Ultra High Resolution* format. Simply attach the Sauven printer to your production line and start printing with a bold and jet black image, *essential for barcodes*.

### Optional remote head

For shrink-wrap trays and other products where space is restricted, or for printing onto the top surface of a product, the remote print head is the solution.

### Specifications

- Ultra high resolution print
- 1 - 4 lines of print
- 3 standard Character heights 3, 9 & 17mm
- Light, normal and bold fonts
- Date, time, shift and count
- Programmable auto repeat print
- Pictorial function keys
- 50 stored messages
- 40 characters/message
- 100M/min print speed (30M/min for bar codes)
- Standard barcodes and logos
- Multi languages
- Non hazardous ink cartridge
- Auto voltage select

### Options

- Remote small print head
- RS232 and RS485 interface
- Variable speed encoder
- Custom Software and print design

### Ink cartridge

Not only does the printer use a black pigmented oil based ink for easy jet control and dense black image, but the ink is contained in a unique push-fit replaceable cartridge. Simple and clean!

### Sauven 6000

The printer is compact, with the print head, control system, and ink cartridge in a single unit. Pictorial keys give instant access to each programming function. Viewing or creating a message, entering a barcode or logo could not be easier.

### Print your product

The standard software offers 3 character heights, up to 4 print lines, bar codes, and a selection of logos. Bespoke software can create any print design. Single or continuous repeating messages can be printed at up to 100 meters/min. Variable speed encoders or the auto-repeat function will give your required high resolution print. The computer interface allows for networking into a fully integrated packaging system, and control of the print layout and design.

- Cartons
- Trays
- Mailing and addressing
- Label overprinting
- Cheque cancelling
- Plasterboard
- Chipboard
- Pharmaceutical packaging
- Sacks
- Continuous web printing
